

Rescue Race

Timed event requiring two people. One rider on horseback crosses the timer line and rides down to the far end of the arena where a second rider waits on a barrel. The waiting rider mounts the horse along with the first rider and they ride in tandem back across the timer line.

In the event that it is not safe for a horse to carry two riders a teddy bear can be placed by a volunteer on the back of the horse behind the rider and they can hold it in place to cross the timer line.

Licorice Race

Timed event where horse and rider cross the timer line, around a barrel on the right hand side of the arena and under a pole on the left, with a licorice dangling down on a string. The rider must successfully grab at least a bite of the licorice with their mouth only – no hands – and ride back across the finish line.
